

D365 BUILD ASSESSMENT

Lay the foundation for a successful project in just 5 days

Developed specifically for small to mid-sized construction companies, **BUILD** is a 5-day workshop specifically designed for business decision makers and anyone who influences business applications in Construction and related industries. Conducted remotely or at your facility, **BUILD** provides insight into how your new construction management solution, built on Dynamics 365 Business Central, enables modern business models and accelerates your business strategy and performance.

B

BASELINE ASSESSMENT

Identify and determine your baseline performance metrics to identify areas for improvement in your new construction management solution. Once your solution is in place you will be able to monitor your achievements to better determine ROI.

U

UTILIZATION ESTIMATE

Estimate your likely Azure costs based on the expected utilization of your proposed production or sandbox environment required to deploy Dynamics 365 Business Central at your organization.

I

INFRASTRUCTURE MIGRATION READINESS

Get an in-depth, comprehensive review of your information systems and solutions and their fit for cloud technology. Our evaluation will include critical areas of your infrastructure that have an impact on your ability to successfully move to the cloud, including access, availability, integrity, speed, redundancy, availability, and mobile enablement.

L

LICENSING ESTIMATE

Get guidance on the various ways you can purchase the software and the strengths and limitations of each option. We can help you work out your named-user counts across the four Business Central user types (Full, Team, Read Only and Device), ProjectPro licenses and any additional third-party solutions that may require Multiplexing.

D

DIAGRAM

Receive a diagram of your recommended solution stack based on your unique business requirements. The Diagram will include your recommended Business Central deployment model, third-party software solutions and extended Microsoft platform solutions including Microsoft 365 and the Power Platform.

DELIVERABLES

- Requirements document that will include all the findings related to the overall:
 - Strategy,
 - Functionality,
 - Data migration,
 - Training
 - and Integrations
- High-level estimate of subscription licensing and services required to deploy Dynamics 365 Business Central in your organization

ABOUT SIKICH
